NEXA FITNESS LIBRARY

Gym Workout Basics

General educational guidance. Follow your facility rules and seek qualified professional advice when needed.

Start safely

If you are new to exercise, begin gently and consider advice from a qualified health professional if you have a medical concern.

Warm up

Spend 5–10 minutes on easy movement, then rehearse the movement with little or no load.

Build a balanced session

Include a manageable mix of strength, aerobic activity, mobility and rest. Choose exercises you can perform with control.

Progress gradually

Increase duration, repetitions or resistance in small steps. Do not increase everything at once.

Stop when needed

Stop exercising for chest pain, faintness, unusual shortness of breath or sharp pain, and seek appropriate help.
